

VEGGIE PLANT PARTS

Name _____

Did you know that vegetables come from all parts of the plant?
Vegetables can be roots, stems, leaves, seeds, flowers or even fruit.*

DIRECTIONS:

Unscramble the part of the plant on the left column. Next,
draw a line from the plant part to the correct vegetable.

O R O T _____

Broccoli

T I U F R _____

Corn

A L F E _____

Carrot

E D S E _____

Celery

T E S M _____

Romaine Lettuce

E O L W F R _____

Tomato

WORD LIST:

Flower, Fruit, Leaf, Root, Seed, Stem

*Yes, vegetables can actually be the "fruit" part of the plant. A botanist (a scientist who studies plants) classifies the fruit of the plant as the part that surrounds the seeds. Examples of vegetables that are the fruit part of the plant include zucchini, cucumbers, peppers, tomatoes and eggplant.

PLANT PART ART

A Science Project You Can Eat!

Ingredients:

Large Flat Cracker

1 celery stick

Peanut butter or low-fat cream cheese

1 lettuce leaf, torn into small pieces

2-3 broccoli florets

1 T. grated carrots

Directions:

Lightly spread cracker with either peanut butter or cream cheese. Next, create a plant or garden design on the cracker by arranging shredded carrots for roots, celery stick for the stem, lettuce for leaves and broccoli for flowers. EAT & ENJOY!
